FACT SHEET

ACRONYMS	IX
EIS SUMMARY	ES-1
CHAPTER 1 PURPOSE AND NEED	1-1
1.1 What is the project purpose and need?.....	1-2
1.2 Where does the project begin and end?	1-4
1.3 What is the project's environmental setting?.....	1-6
1.4 How have FHWA and WSDOT responded to the project's environmental setting?	1-9
1.5 What parts of the project have been funded?	1-12
1.6 How long will it take to build the project?	1-13
1.7 Why have FHWA and WSDOT prepared this environmental impact statement?	1-14
1.8 Who are the project proponent and lead agencies?.....	1-15
1.9 Who are the cooperating agencies?.....	1-15
1.10 What are the steps in the environmental review process?	1-16
1.11 How did the lead agencies respond to comments on the Draft EIS?	1-20
1.12 What permits and approvals are required to complete the project?	1-23
1.13 What other actions are necessary to complete the project?.....	1-24
1.14 What other USFS actions could affect the project?.....	1-30
1.15 Tribal Consultation	1-32
1.16 References.....	1-34
CHAPTER 2 ALTERNATIVES CONSIDERED	2-1
2.1 How did FHWA and WSDOT identify the range of alternatives?.....	2-1
2.2 How were the alternatives for the Keechelus Lake Alignment analyzed?	2-5
2.3 How were the alternatives for the remainder of the project area analyzed?.....	2-9
2.4 How was the project subsequently modified?	2-15
2.5 How has the project avoided and minimized environmental impacts?	2-22
2.6 What would the project cost?	2-28
2.7 What are the expected environmental consequences?.....	2-34
2.8 How would FHWA and WSDOT mitigate for the adverse impacts?	2-40
2.9 Would there be unavoidable impacts following mitigation?	2-41
2.10 How would construction affect travel in the project area?	2-41
2.11 Where would construction materials be stored and processed?	2-47
CHAPTER 3 AFFECTED ENVIRONMENT AND CONSEQUENCES	3-1
3.1 Geology and Soils	3-2
3.2 Air Quality	3-18
3.3 Water Resources	3-28
3.4 Wetlands and Other Jurisdictional Waters	3-54

3.5	Fish, Aquatic Species, and Habitats.....	3-74
3.6	Terrestrial Species	3-90
3.7	Transportation	3-109
3.8	Noise.....	3-126
3.9	Historic, Cultural, and Archaeological Resources	3-136
3.10	Recreation Resources.....	3-143
3.11	Land Use.....	3-153
3.12	Visual Quality	3-174
3.13	Social and Economic Resources.....	3-183
3.14	Hazardous Materials and Waste	3-192
3.15	Energy.....	3-196
3.16	Cumulative Effects	3-199
3.17	Other Environmental Considerations	3-214
	CHAPTER 4 MITIGATION SUMMARY	4-1
4.1	Commitments Related to Best Management Practices	4-1
4.2	Commitments Related to Compensatory Mitigation	4-8
4.3	Commitments Related to CEA Design	4-15
4.4	Other Project Commitments	4-15
	CHAPTER 5 PROGRAMMATIC SECTION 4(F) EVALUATION	5-1
5.1	Introduction	5-1
5.2	Use.....	5-15
5.3	Applicability	5-15
5.4	Alternatives	5-16
5.5	Findings	5-16
5.6	Measures to Minimize Harm	5-46
5.7	Procedures.....	5-47
5.8	Coordination.....	5-48
5.9	Conclusion	5-48
5.10	References.....	5-49
Appendix A	Agreement Between WSDOT and State Parks for the Temporary Occupancy of Crystal Springs Sno-Park	
Appendix B	Agreement Between WSDOT and USFS for the Temporary Occupancy of Cabin Creek Sno-Park	
Appendix C	Memorandum of Agreement Between the Federal Highway Administration and the Washington State Historic Preservation Officer Regarding the I-90 Snoqualmie Pass East Project, Kittitas County, Washington	
Appendix D	WSDOT Bridge Inspection Report December 12, 2005	
	CHAPTER 6 CONSULTATION AND COORDINATION.....	6-1
6.1	How has the public been involved in this project?.....	6-1
6.2	How have the lead agencies consulted with other agencies and tribes?	6-4

CHAPTER 7 REFERENCES7-1
CHAPTER 8 DISTRIBUTION LIST.....8-1
CHAPTER 9 LIST OF PREPARERS/CONTRIBUTORS9-1
CHAPTER 10 GLOSSARY 10-1
INDEXI-1

LIST OF EXHIBITS

Exhibit ES-1 Process of Development ES-8
 Exhibit ES-2 Initial Route Alternatives ES-10
 Exhibit ES-3 Initial Keechelus Lake Alignment Alternatives ES-12
 Exhibit ES-4 The MDT’s Evaluation of the CEA Options..... ES-16
 Exhibit ES-5 Project Connectivity Emphasis Areas ES-18
 Exhibit ES-6 The IDT’s Recommendations at Individual CEAs ES-19
 Exhibit ES-7 Keechelus Lake Alignment Alternatives as Modified by the IDT and WSDOT ES-21
 Exhibit ES-8 Preferred Alternative Major Improvements ES-22
 Exhibit ES-9 Summary of Effects of the Project ES-24
 Exhibit ES-10 Permanent Adverse Impacts, Keechelus Lake Alignment Alternatives ES-26
 Exhibit ES-11 Permanent Adverse Impacts, CEA Improvement Packages ES-27
 Exhibit ES-12 Summary of Performance Standards Governing Construction BMPs ES-30
 Exhibit ES-13 Summary of Compensatory Mitigation Approaches ES-33
 Exhibit ES-14 Existing Highway Cross Section ES-37
 Exhibit ES-15 Permits, Approvals, and Agreements ES-42
 Exhibit 1-1 Project Area 1-1
 Exhibit 1-2 Project Location 1-5
 Exhibit 1-3 Publicly Owned and Managed Lands Within the Project Area 1-7
 Exhibit 1-4 Project Phases 1-13
 Exhibit 1-5 The EIS Process 1-16
 Exhibit 1-6 Top 10 Comments on the Draft EIS 1-21
 Exhibit 1-7 Permits, Approvals, and Agreements 1-23
 Exhibit 1-8 USFS Crossing Structures 1-30
 Exhibit 2-1 Initial Route Alternatives..... 2-2
 Exhibit 2-2 EIS Decision Areas 2-4
 Exhibit 2-3 Keechelus Lake Alignment Alternatives 2-6
 Exhibit 2-4 Project Connectivity Emphasis Areas 2-10
 Exhibit 2-5 The MDT’s Evaluation of the CEA Options 2-12
 Exhibit 2-6 The IDT’s Recommendations at Individual CEAs..... 2-14
 Exhibit 2-7 Design Visualization of Preferred Alternative for Gold Creek 2-16
 Exhibit 2-8 Design Visualization of Wildlife Overcrossing at MP 60.8 2-17

Exhibit 2-9 Design Visualization of Hudson Creek Bridges to allow Wildlife Crossings under I-90	2-18
Exhibit 2-10 Revised Keechelus Lake Alignment Alternatives	2-21
Exhibit 2-11 Preferred Alternative Major Improvements	2-22
Exhibit 2-12 Development of the Preferred Alternative	2-24
Exhibit 2-13 Examples of Stormwater Treatment	2-27
Exhibit 2-14 Draft EIS Base Cost Comparisons in 2003 dollars	2-29
Exhibit 2-15 Updated Base Cost Comparisons in 2007 dollars	2-29
Exhibit 2-16 Cost Comparisons Including Risk and Inflation	2-30
Exhibit 2-17 Total Project Cost Compared to Currently Allocated Funding	2-31
Exhibit 2-18 Estimated Maintenance Costs, Keechelus Lake Alignment Alternatives	2-33
Exhibit 2-19 Estimated Maintenance Costs, CEA Improvement Packages	2-33
Exhibit 2-20 Permanent Adverse Impacts, Keechelus Lake Alignment Alternatives	2-37
Exhibit 2-21 Permanent Adverse Impacts, CEA Improvement Packages Area	2-39
Exhibit 2-22 Compensatory Mitigation Approach and Project Commitments for Permanent Impacts	2-42
Exhibit 2-23 Existing Highway Cross Section	2-45
Exhibit 2-24 Potential Auxiliary Sites	2-48
Exhibit 3-1 Avalanche Chutes	3-8
Exhibit 3-2 Estimated Cut and Fill Volumes	3-11
Exhibit 3-3 Estimated Aggregate Quantity Summary	3-11
Exhibit 3-4 Pre-Settlement Hydrologic Cycle	3-30
Exhibit 3-5 Existing Conditions Hydrologic Cycle	3-31
Exhibit 3-6 Hydrologic Connectivity Structures Linking Low Gradient Wetlands	3-39
Exhibit 3-7 Hydrologic Connectivity Structures for Seepage Zones	3-40
Exhibit 3-8 Modeled Pollutant Load Rates	3-42
Exhibit 3-9 Pre- and Post-Project Pollutant Loading	3-42
Exhibit 3-10 Modeled Pollutant Concentrations	3-43
Exhibit 3-11 Pre- and Post-Project Pollutant Concentrations	3-44
Exhibit 3-12 Preferred Alternative Hydrologic Cycle	3-45
Exhibit 3-13 Average Keechelus Lake High Water Elevation from 1985 through 2007	3-58
Exhibit 3-14 Permanent Impacts, Keechelus Lake Alignment Alternatives	3-64
Exhibit 3-15 Permanent Impacts, CEA Improvement Packages	3-65
Exhibit 3-16 Change in Acres of Wetland Impacts by Wetland Category for Entire 15-mile Project from 2004 to 2008 Design	3-67
Exhibit 3-17 Primary Water Bodies in the Project Area	3-75
Exhibit 3-18 Amphibian Species Status	3-77
Exhibit 3-19 Known Fish Passage Barriers in the Project Area	3-78
Exhibit 3-20 Fish Species Status	3-79
Exhibit 3-21 Beneficial Impacts for Keechelus Lake Alignment and Improvement Packages Area	3-83
Exhibit 3-22 Effects Determination – ESA-Listed Fish Species	3-87

Exhibit 3-23 Habitat Linkage Areas	3-92
Exhibit 3-24 Habitat Fragmentation in and Near the I-90 Corridor	3-94
Exhibit 3-25 Summary of Habitat Impacts – Keechelus Lake Alignment Alternatives	3-101
Exhibit 3-26 Summary of Habitat Impacts – CEA Improvement Packages	3-102
Exhibit 3-27 Effects Determination – Terrestrial Species	3-102
Exhibit 3-28 Principal Roads in the Project Area.....	3-110
Exhibit 3-29 Predicted Annual Average Daily Traffic – 2005.....	3-112
Exhibit 3-30 Estimated Level of Service Deterioration	3-112
Exhibit 3-31 Hourly Traffic Volumes – 2007 Yearly Average.....	3-113
Exhibit 3-32 Seasonal Traffic Variation – 2005	3-114
Exhibit 3-33 Historic I-90 Closure Data between 1992 and 2008.....	3-115
Exhibit 3-34 Chain-Up and Chain-Off Areas	3-117
Exhibit 3-35 Change to Level of Service – Preferred Alternative vs No-Build Alternative	3-120
Exhibit 3-36 Proposed Chain-Up/Chain-Off Areas	3-121
Exhibit 3-37 Existing Highway Cross Section.....	3-123
Exhibit 3-38 Modeled Noise Receptors	3-128
Exhibit 3-39 Noise Model and Validation Results for 2007.....	3-129
Exhibit 3-40 Construction Noise Limits.....	3-129
Exhibit 3-41 Developed Recreation Destinations	3-145
Exhibit 3-42 Recreation Areas Within or Accessible from the I-90 Corridor	3-146
Exhibit 3-43 Priority Mitigation Sites for Price Creek Sno-Park (Westbound).....	3-152
Exhibit 3-44 Snoqualmie Pass Adaptive Management Area (SPAMA)	3-154
Exhibit 3-45 Private Land Use and Zoning in the Project Area	3-156
Exhibit 3-46 Vacant and Occupied Private Land.....	3-159
Exhibit 3-47 Size of Private Land Parcels in the Study Area.....	3-160
Exhibit 3-48 Private Land Vacancy Rates	3-160
Exhibit 3-49 Urban Growth Nodes.....	3-162
Exhibit 3-50 Permanent Land Acquisition, Keechelus Lake Alignment Alternatives.....	3-165
Exhibit 3-51 Permanent Land Acquisition, CEA Improvement Packages.....	3-165
Exhibit 3-52 Potential Acquisition and Relinquishment Areas MP 55 to MP 57	3-166
Exhibit 3-53 Potential Acquisition and Relinquishment Areas MP 57 to MP 61	3-167
Exhibit 3-54 Potential Acquisition and Relinquishment Areas MP 61 to MP 65	3-168
Exhibit 3-55 Potential Acquisition and Relinquishment Areas MP 65 to MP 68	3-169
Exhibit 3-56 Potential Acquisition and Relinquishment Areas MP 68 to MP 70	3-170
Exhibit 3-57 View of Topography at MP 58 (the Snowshed) in Landscape Unit 1	3-176
Exhibit 3-58 View of Topography in Landscape Unit 2.....	3-176
Exhibit 3-59 View of Topography in Landscape Unit 3.....	3-177
Exhibit 3-60 View of Topography (Eastbound I-90) in Landscape Unit 4	3-178
Exhibit 3-61 Concept for Snowshed after Project Completion.....	3-181

Exhibit 3-62 Estimated Opportunity Cost of I-90 Closure	3-184
Exhibit 3-63 Known Hazardous, Toxic, or Radiological Waste Sites	3-193
Exhibit 3-64 Relevant Past, Present, and Reasonably Foreseeable Future Actions	3-202
Exhibit 3-65 Description of Project Area Past, Present, and Reasonably Foreseeable Future Actions.....	3-203
Exhibit 5-1 Project Location	5-2
Exhibit 5-2 Temporary Occupancy and Section 4(f) Resources.....	5-4
Exhibit 5-3 Lake Keechelus Snowshed Bridge Vicinity	5-11
Exhibit 5-4 Lake Keechelus Snowshed Bridge Construction in 1951	5-12
Exhibit 5-5 Lake Keechelus Snowshed Bridge Construction Showing Design Details	5-13
Exhibit 5-6 Lake Keechelus Snowshed Bridge Avoidance Alternatives, Existing Alignment, and Preferred Alternative	5-17
Exhibit 5-7 Avalanche Chutes in the Area of the Lake Keechelus Snowshed Bridge	5-20
Exhibit 5-8 Lake Keechelus Snowshed Bridge and Avalanche	5-21
Exhibit 5-9 Roaring Ridge Avoidance Alternative.....	5-24
Exhibit 5-10 Viaduct Bridge Avoidance Alternative – Artist’s Rendition.....	5-34

DISC ONE

- Appendix A – Comments and Responses to the Draft EIS
- Appendix B – Preferred Alternative Briefing
- Appendix C – Project Design
- Appendix D – MDT Recommendation Package
- Appendix E – Materials and Staging Report
- Appendix F – Avalanche Technical Reports
- Appendix G – Unstable Slopes on I-90 Snoqualmie Pass
- Appendix H – Water Resources Addendum to the EIS
- Appendix I – Stormwater Treatment and BMP Report
- Appendix J – Conceptual Wetland & Aquatic Resources Mitigation Plan
- Appendix K – Wetland/Biology Discipline Report (2008)
- Appendix L – Section 404(b)(1) Alternatives Analysis
- Appendix M – Biological Assessment
- Appendix N – Keechelus Lake Reservoir Storage Technical Memo
- Appendix O – Wildlife Monitoring Plan
- Appendix P – Transportation Discipline Report
- Appendix Q – Bicycle Route Recommendations
- Appendix R – Noise Discipline Report Supplement
- Appendix S – Recreation Impacts/Preliminary Mitigation Site Analysis
- Appendix T – Section 6(f) Recreation Lands Technical Memorandum
- Appendix U – Land Use Technical Memorandum
- Appendix V – Visual Discipline Report Supplement
- Appendix W – US Forest Service Consistency Determination Support Information
- Appendix X – Architectural Design Guidelines
- Appendix Y – Construction Water Needs Technical Memorandum
- Appendix Z – Archaeological, Cultural and Historic Resources

DISC TWO

- Draft EIS and Appendices
